

Appl. No. : 10/616,126
Filed : July 8, 2003

IN THE SPECIFICATION

1. On Page 35, lines 7-18 of the specification, please amend the text as follows:

--Referring now to Figs. 15a-c, one embodiment of the ICG module of the present invention adapted for rack mounting is described. As shown in Fig. 15, the module 1500 is fitted with a faceplate 1502 disposed generally at the front portion 1506 of the module housing 1504, as well as a plurality of electrical connectors 1510, 1512, one connector 1510 disposed generally at the front portion 1506 of the housing, and one connector 1512 at the rear portion 1515 of the housing 1504. A debug port connector (~~not shown~~) 1207 is also provided to facilitate debug of the microprocessor 1206. Optional module status indicators 1520 are also disposed on the faceplate 1502 so as to be viewable by a user or clinician during operation of the module when the module is received within an equipment "rack" (described in greater detail below). In the illustrated embodiment, the module housing 1504 is shaped and sized so as to be received within the rack adjacent or generally in proximity to other modules, such that space is economized.--
